

# ARCHITECTURAL HISTORY SURVEY AND UPDATE FOR THE CITY OF CEDAR RAPIDS, LINN COUNTY, IOWA

Submitted to:  
Cedar Rapids Department of Community Development

Submitted by:  
The 106 Group Ltd.

June 2006

## MANAGEMENT SUMMARY

During February and March of 2006, The 106 Group Ltd. (The 106 Group) conducted an architectural history survey and survey update for the Department of Community Development – Housing Services in Cedar Rapids, Iowa. This survey was undertaken because the City annually receives entitlement grants from the U.S. Department of Housing and Urban Development (HUD) through the Federal Community Development Block Grant (CDBG) and HOME Investment Partnership Programs. When applied toward the rehabilitation of a property, this funding requires compliance with Section 106 of the National Historic Preservation Act of 1966, as amended. This survey was completed to assist the City of Cedar Rapids in updating its historical and architectural survey of five neighborhoods adjacent to the city center to fulfill its requirements under the HUD programs.

The purpose of the architectural history investigation was two-fold: 1) to update existing survey information, such as historical integrity, and to provide a recommendation for a property's eligibility for listing in the National Register of Historic Places (NRHP) for those properties previously surveyed, but not having an eligibility determination; and 2) to survey and provide a determination of eligibility of previously un-surveyed residential properties within the Oak Hill neighborhood of Cedar Rapids. The final recommendations were presented in an inventory form format acceptable to the Iowa State Historic Preservation Office (SHPO). To accomplish these goals, The 106 Group developed a database that would allow the City to produce individual forms, and to add or update properties as needed.

This study is the continuation of several studies undertaken by Cedar Rapids to survey the historical resources of its inner neighborhoods. A reconnaissance survey (Svendsen 1994), intensive survey (Svendsen 1995) and a NRHP multiple property documentation form (Svendsen 2000) have all been completed for the study area. The evaluation for the properties in this study was undertaken within the historical contexts provided in these studies.

The 106 Group updated the inventory forms for 262 previously surveyed properties. Of these, 133 are recommended as eligible for listing on the NRHP; 129 are recommended not eligible for listing on the NRHP. The 106 Group also surveyed 333 residential properties in the Oak Hill neighborhood that had not been previously surveyed. Of these, 28 are recommended as eligible for listing on the NRHP and 305 are recommended as not eligible.

## **1.0 INTRODUCTION**

During February and March of 2006, The 106 Group Ltd. (The 106 Group) conducted an architectural history survey and survey update for the Department of Community Development – Housing Services in Cedar Rapids, Iowa. This survey was undertaken because the city annually receives entitlement grants from the U.S. Department of Housing and Urban Development (HUD) through the Federal Community Development Block Grant (CDBG) and HOME Investment Partnership Programs. When applied toward the rehabilitation of property, this funding requires compliance with Section 106 of the National Historic Preservation Act of 1966, as amended. The survey was completed to assist the City of Cedar Rapids in updating its historical and architectural survey of five neighborhoods adjacent to the city center to fulfill its requirements under the HUD programs.

The purpose of the architectural history investigation was two-fold: 1) to update existing survey information, such as historical integrity, and to provide a recommendation for a property's eligibility for listing in the National Register of Historic Places (NRHP) for those properties previously surveyed, but not having an eligibility determination; and 2) to survey and provide a determination of eligibility of previously un-surveyed residential properties within the Oak Hill neighborhood of Cedar Rapids. The final recommendations were presented in an inventory form format acceptable to the Iowa State Historic Preservation Office (SHPO). To accomplish these goals, The 106 Group developed a database that would allow the City to produce individual forms, and to add or update properties as needed.

The project is located in five neighborhoods surrounding the Cedar Rapids city center: Young's Hill/Kingston; Time Check/St. Patrick's; Cedar Lake/Daniel's Park; Coe/Mt. Vernon; and Riverside/Oak Hill (Figure 1). The architectural history investigation consisted of a review of documents of previously inventoried properties and of surveys previously conducted within the project area, as well as a field survey to identify and document properties that are 40 years of age or older within the study area.

### **1.1 PROJECT HISTORY**

In 1993, the City of Cedar Rapids retained Svendsen Tyler, Inc. to complete a historical and architectural survey of the five residential neighborhoods that were designated as urban renewal areas. The subsequent reconnaissance survey and report (Svendsen 1994) recommended a follow-up intensive survey of selected individual properties. In the subsequent intensive survey, more than 530 blocks were studied and individual "Cedar Rapids Site Inventory" forms were completed for 1,524 buildings. The report included extensive historical contexts for the applicable neighborhoods and examined early settlement patterns; the impact of railroads, street railways and the automobile on Cedar Rapids; economic trends and industry; ethnic groups; social and cultural life;

architectural styles; and the stories of various residential neighborhoods. The investigation resulted in the identification of nine potential historic districts (three districts were later combined into one historic district) and numerous individually eligible properties (Svendsen 1995).

That study provided the basis for the NRHP Multiple Property Documentation Form (MPDF) titled *Historic Resources of Cedar Rapids, Iowa* with the associated contexts of *Architectural and Historical Resources of Residential Neighborhoods, 1870-1940* (Svendsen 2000). The Keeper of the NRHP accepted the document in 2000. Within the MPDF, the historic districts and most of the buildings individually identified in the 1995 intensive study were listed in this document, indicating that they are considered potentially eligible for listing on the NRHP. Two historic districts identified in the MPDF have since been listed on the NRHP – the 2<sup>nd</sup> and 3<sup>rd</sup> Avenue Historic District and the Redmond Park-Grand Avenue Place Historic District.

The present survey was charged with the mission to update those previously surveyed properties located outside of the historic districts to note significant changes in historical integrity and to affirm their continued eligibility for listing in the NRHP. In addition, all other previously un-surveyed residential properties within the Oak Hill neighborhood were documented and evaluated for NRHP eligibility.

## **1.2 REPORT STRUCTURE**

The following report describes project methodology, previous investigations, survey results, and recommendations for additional survey work in central Cedar Rapids. Lists of updated properties and their recommended eligibility status can be found in Appendix B; lists of newly surveyed properties and their recommended eligibility status can be found in Appendix C.

## **2.0 METHODS**

### **2.1 OBJECTIVES**

The primary objectives of the architectural history investigation were to determine whether the study area contains any buildings, structures, or other properties of 40 years in age or older and if those properties are eligible for listing on the NRHP. In addition, The 106 Group developed a database for the City of Cedar Rapids to assist in the continued management of surveyed properties. All work was conducted in accordance with *The Secretary of the Interior's Standards and Guidelines for Archeology and Historic Preservation* [48 Federal Register 44716-44740] (National Park Service [NPS] 1983).

### **2.2 EXPECTED RESULTS**

In addition to providing extensive historical contexts for the five neighborhoods, the 1995 survey successfully identified over 1,500 properties with the highest potential for NRHP eligibility. Most of those buildings – approximately 1,280 – were identified as contributing to proposed NRHP-eligible historic districts. The remaining surveyed properties were presumed to be potentially eligible for the NRHP within the context of the MPDF (Svendsen 2000). Because the best examples of property types were identified during the 1995 intensive survey and were considered potentially eligible within the MPDF, it was expected that only those properties whose architectural significance had been significantly impaired since the earlier study would be recommended as *not* eligible for the NRHP.

Newly surveyed properties within the Oak Hill neighborhood had been excluded from the previous surveys. Since the best examples of building types had already been identified within that neighborhood, a low incidence of NRHP-eligible properties would be expected from the newly surveyed properties in Oak Hill.

### **2.3 DATABASE DEVELOPMENT**

Individual property data from the previous intensive survey was entered into a Microsoft Access database using the data fields required for the Iowa Site Inventory Form. Information for newly surveyed properties was also entered into this database. The database was provided to the City to manage and organize the data for each property and to create inventory forms for submission to the Iowa SHPO.

### **2.4 BACKGROUND RESEARCH**

On February 13 and 14, 2006, prior to the start of the field survey, staff from The 106 Group conducted background research at the Iowa SHPO for information on previously inventoried properties and on surveys previously conducted within the project area.

## **2.0 METHODS**

### **2.1 OBJECTIVES**

The primary objectives of the architectural history investigation were to determine whether the study area contains any buildings, structures, or other properties of 40 years in age or older and if those properties are eligible for listing on the NRHP. In addition, The 106 Group developed a database for the City of Cedar Rapids to assist in the continued management of surveyed properties. All work was conducted in accordance with *The Secretary of the Interior's Standards and Guidelines for Archeology and Historic Preservation* [48 Federal Register 44716-44740] (National Park Service [NPS] 1983).

### **2.2 EXPECTED RESULTS**

In addition to providing extensive historical contexts for the five neighborhoods, the 1995 survey successfully identified over 1,500 properties with the highest potential for NRHP eligibility. Most of those buildings – approximately 1,280 – were identified as contributing to proposed NRHP-eligible historic districts. The remaining surveyed properties were presumed to be potentially eligible for the NRHP within the context of the MPDF (Svendsen 2000). Because the best examples of property types were identified during the 1995 intensive survey and were considered potentially eligible within the MPDF, it was expected that only those properties whose architectural significance had been significantly impaired since the earlier study would be recommended as *not* eligible for the NRHP.

Newly surveyed properties within the Oak Hill neighborhood had been excluded from the previous surveys. Since the best examples of building types had already been identified within that neighborhood, a low incidence of NRHP-eligible properties would be expected from the newly surveyed properties in Oak Hill.

### **2.3 DATABASE DEVELOPMENT**

Individual property data from the previous intensive survey was entered into a Microsoft Access database using the data fields required for the Iowa Site Inventory Form. Information for newly surveyed properties was also entered into this database. The database was provided to the City to manage and organize the data for each property and to create inventory forms for submission to the Iowa SHPO.

### **2.4 BACKGROUND RESEARCH**

On February 13 and 14, 2006, prior to the start of the field survey, staff from The 106 Group conducted background research at the Iowa SHPO for information on previously inventoried properties and on surveys previously conducted within the project area.

## **2.5 LOCAL RESEARCH**

Research on newly surveyed properties that retain sufficient historical integrity and had potential to have historical significance were researched at several local institutions. Historical building permits were pulled, reviewed and noted at the Cedar Rapids Department of Building and Zoning. General histories, city directory research, and Sanborn Fire Insurance Company maps were reviewed at the Cedar Rapids Main Public Library. During the winter of 2006, the Linn County Historical Society was temporarily closed during the research phase of the investigation, and therefore inaccessible for research.

## **2.6 FIELD METHODS**

An initial drive-by survey of the Oak Hill neighborhood was conducted in order to identify those properties that appeared to be 40 years in age or older. Each of these properties was subsequently documented with field notes and digital photographs. For updated properties, addresses of the previously documented properties not located within a historic district were located. Properties were photographed with digital images and a statement of changes to the integrity of the building since the previous documentation was noted.

## **2.7 INVENTORY FORMS**

An Iowa Site Inventory Form was completed for each documented property.

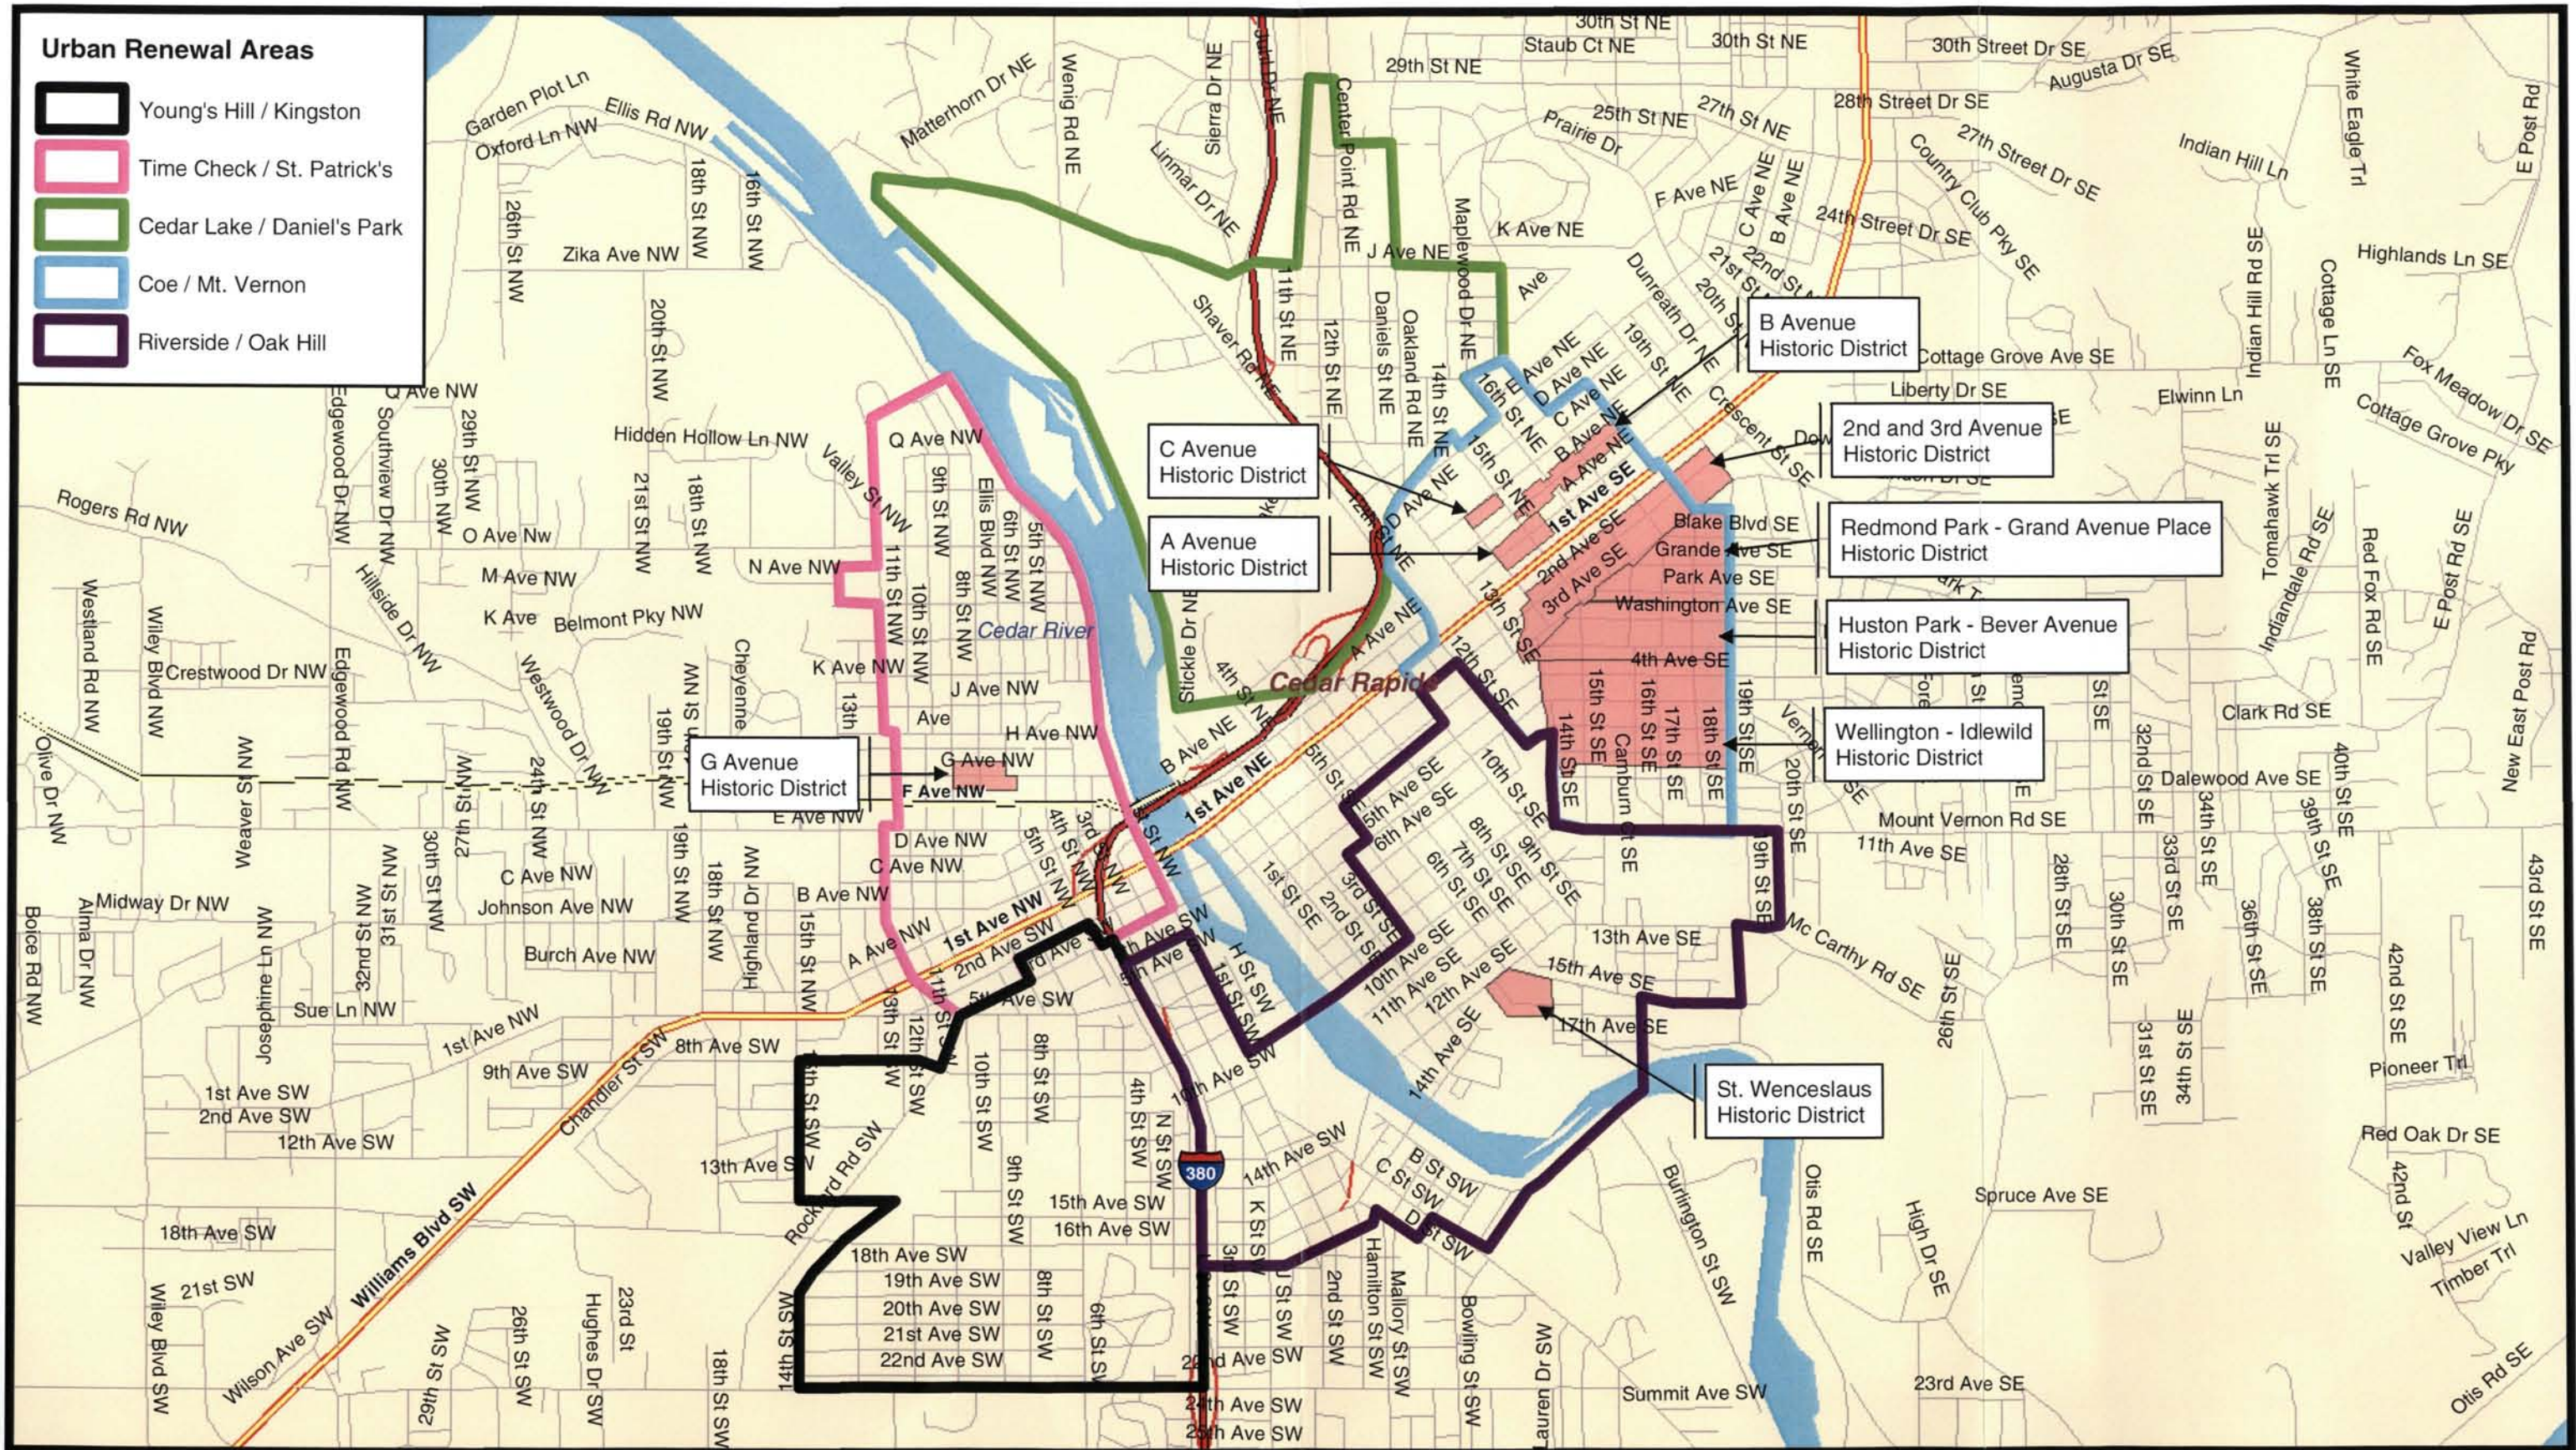

## **2.8 EVALUATION**

Upon completion of the fieldwork, the eligibility of each resource for listing on the NRHP was assessed based on the property's potential significance and integrity. The NRHP criteria, summarized below, were used to help assess the significance of each property:

- Criterion A – association with the events that have made a significant contribution to the broad patterns of our history;
- Criterion B – association with the lives of persons significant in our past;
- Criterion C – embodiment of the distinctive characteristics of a type, period, or method of construction; representation of the work of a master; possession of high artistic values; or representation of a significant and distinguishable entity whose components may lack individual distinction; or
- Criterion D – potential to yield information important to prehistory or history (NPS 1995).

The NPS has identified seven aspects of integrity to be considered when evaluating the ability of a property to convey its significance: location, design, setting, materials, workmanship, feeling, and association. The integrity of each property or site was assessed in regard to these seven aspects. The properties were also assessed to determine

Source: City of Cedar Rapids, Dept. of Community Development, Housing Services (2005); Svendsen, 1995

if they represent a type of property to be excluded from the NRHP because of Criteria Considerations (NPS 1995).

In addition, the *Historic Resources of Cedar Rapids, Iowa* MPDF (Svendsen 2000) provided additional guidance for areas of significance, level of significance, and integrity considerations for those properties evaluated within that historical context.

## 2.9 STANDARDS OF HISTORICAL INTEGRITY

The 106 Group further utilized standards for historical integrity to both determine which of the previously inventoried properties no longer retained sufficient historical integrity to be considered eligible for the NRHP and to determine which of the newly inventoried properties had sufficient integrity to warrant further research. Those standards of integrity were based upon the *Programmatic Memorandum of Understanding between the City of Cedar Rapids and the Iowa State Historic Preservation Office* (undated copy provided by the Iowa SHPO). In Exhibit C of that document – “Updating Property Evaluations” – standards for “substantial changes” were established to determine when a previously considered eligible property would no longer be eligible as a result of modifications. For the purposes of that programmatic memorandum of understanding, “substantial” changes were defined as any modifications that considerably alter the visual appearance of the exterior of the property, including, but not limited to:

- Removal, replacement or installation of siding materials (vinyl, aluminum, asbestos shingle, asphalt shingle);
- Installation of new window sash or creation of new window or door openings;
- Changes to the size of, or removal of, existing window or door openings;
- Enclosing or opening of porches; or
- Construction of building additions that are visible from the public right-of-way;

Changes in paint color were not considered a substantial change.

These standards for changes to integrity were utilized for the evaluation of both previously surveyed properties and for newly documented properties.

### 3.0 PREVIOUS FINDINGS

#### 3.1 PREVIOUS ARCHITECTURAL HISTORY STUDIES

##### 3.1.1 Cedar Rapids Survey

As previously noted, the five neighborhood areas surveyed in this investigation had been studied during a 1994 reconnaissance survey and a 1995 intensive survey (Svendsen 1994; Svendsen 1995). As a result, 1,524 buildings were identified and Cedar Rapids Site Inventory forms were prepared. In the course of the intensive survey, nine historic districts were proposed (Table 1; Figure 2). Two historic districts have been listed on the NRHP, three are considered eligible by the Iowa SHPO, and four are potentially eligible for the NRHP. These districts and individual properties were subsequently identified in the MPDF entitled *Historic Resources of Cedar Rapids, Iowa* within the associated historic context of *Architectural and Historical Resources of Residential Neighborhoods, 1870-1940* (Svendsen 2000). The result of this MPDF is that many of the properties identified in that documentation – both districts and individual buildings – are considered potentially eligible for listing on the NRHP.

For the purposes of rehabilitation of properties within all of the nine historic districts, the Cedar Rapids Housing Services office assumes NRHP-eligibility and treats the properties in accordance with the *Secretary of the Interior's Standards for Rehabilitation*.

TABLE 1. PREVIOUSLY PROPOSED HISTORIC DISTRICTS

District Name/Number	Neighborhood	NRHP Status
G Avenue Historic District/57-00085	Timecheck/St. Patrick's	Potentially eligible
A Avenue Historic District/57-00086	Coe/Mount Vernon	Potentially eligible
B Avenue Historic District/57-00087	Coe/Mount Vernon	Potentially eligible
C Avenue Historic District/57-00088	Coe/Mount Vernon	Potentially eligible
2 <sup>nd</sup> & 3 <sup>rd</sup> Avenue Historic District/57-00090	Coe/Mount Vernon	Listed
Redmond Park-Grand Avenue Place Historic District/57-00093	Coe/Mount Vernon	Listed
Huston Park-Bever Avenue Historic District/57-00092	Coe/Mount Vernon	Opinion of Eligibility
Wellington-Idelwild Historic District/57-00091	Coe/Mount Vernon	Opinion of Eligibility
St. Wenceslaus Historic District/57-00089	Oak Hill	Opinion of Eligibility

### **3.1.2 Other Surveys**

One additional architectural history study was conducted within the current survey area. *A Reconnaissance Survey of The Green & College Addition and an Intensive Level Survey of 316-17<sup>th</sup> Street NE, Cedar Rapids, Iowa* was prepared for the City of Cedar Rapids Building, Housing and Zoning Department by Svendsen Tyler, Inc. (Svendsen 2003). The study included a survey of the Green & College Addition in the northeast quadrant of Cedar Rapids, portions of which were previously included in the reconnaissance and intensive level surveys noted above. The study led to an intensive investigation of the property at 316 17<sup>th</sup> Street NE. That property was determined not eligible for listing on the NRHP.

## **4.0 RESULTS**

Staff from The 106 Group conducted an architectural history survey in Cedar Rapids in February and March 2006. William Stark, M.A., served as Principal Investigator and Jeanne-Marie Mark served as field coordinator. Fieldwork was conducted with Jennifer Tworzyanski and Lesley Kadish.

### **4.1 UPDATED PROPERTY EVALUATIONS**

As anticipated, many of the previously surveyed properties were found to meet the significance requirement of the MPDF. However, significant numbers had been physically altered since the previous survey, resulting in substantial alterations and compromised integrity, making them not eligible for listing on the NRHP. Of the 262 update properties, 133 are recommended as eligible for listing on the NRHP. The remaining 129 properties are recommended as not eligible. See Appendix B for tables listing the eligible and not eligible updated properties.

### **4.2 NEWLY SURVEYED PROPERTIES/OAK HILL NEIGHBORHOOD**

#### ***4.2.1 Oak Hill Neighborhood Overview***

The Oak Hill neighborhood is located in the southeast quadrant of Cedar Rapids, roughly bound by Mount Vernon Road and 12<sup>th</sup> Street SE on the north, Fourth Avenue SE on the west, 20<sup>th</sup> and 19<sup>th</sup> Streets SE on the east, and Fourth Street SE to the south. It is situated adjacent to the central business district (on the west) and the Bohemian neighborhood (to the south). As its name implies, Oak Hill contains rolling hills above the flood plain to the east, but also includes flat areas closer to the Cedar River (Figure 3).

Anchoring the neighborhood is the Oak Hill Cemetery, established in 1854 when internments from the former village cemetery were removed to the new property. The 41-acre cemetery has since been used as a final resting place for many citizens of Cedar Rapids. Adjacent to the Oak Hill Cemetery is St. John's Cemetery. A third cemetery in the neighborhood is the Catholic Bohemian Cemetery located approximately ten blocks northeast of St. Wenceslaus Church. Van Vechten Park, established in 1927, creates yet another green space that forms the border of the Oak Hill neighborhood. In 1886, the streetcar line was extended to the northern section of Oak Hill, connecting the downtown with the Oak Hill Cemetery (Svendsen 2000).

The founding of the T. M. Sinclair Packing Company on the eastern edge of Oak Hill in 1872 had a profound impact on the residential development of the neighborhood. With a workforce of 800 people by 1900, the employees of the plant often found housing in the adjoining residential neighborhood. Workers from the nearby shops of the Chicago &

Northwestern Railroad and operations from the Rock Island Railroad also found housing in Oak Hill. Those areas closest to these employment centers exhibit the modest worker cottages of these Cedar Rapids citizens. The community was laid out with narrow streets and small lots, frequently devoid of curbs, gutters, and sidewalks. Houses are comprised of single-story gabled cottages, often with porches supported by turned posts. Many of these the modest houses have been poorly maintained and/or extensively altered.

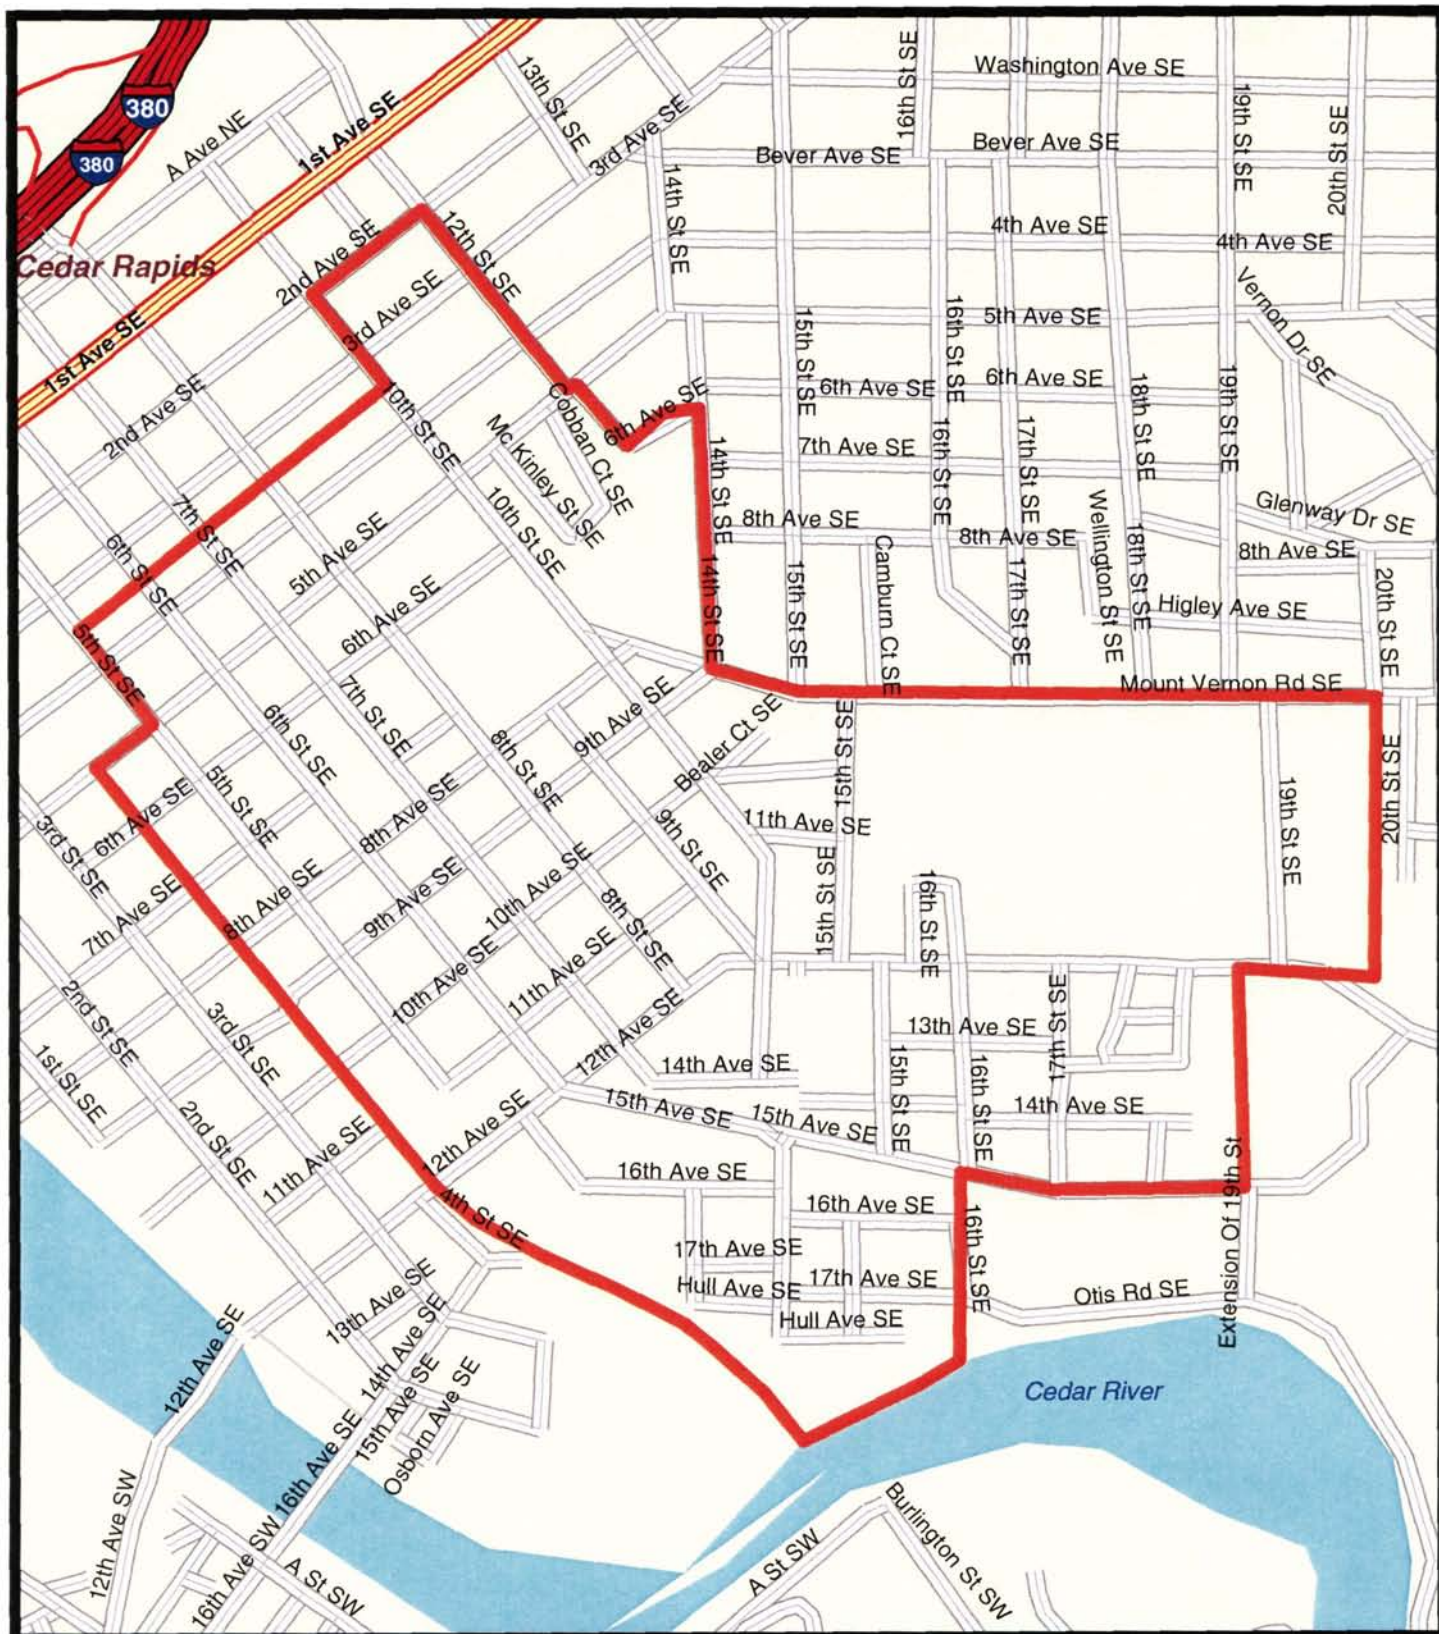

Within Oak Hill, a district of worker homes near the St. Wenceslaus Church, were identified as forming the St. Wenceslaus Historic District. The nearly identical worker cottages originated as rental housing provided by the Sinclair Packing Company. Central to the district was the church, an impressive 1904 brick building constructed to serve its 1,200 parishioners of the primarily Bohemian community. The district is considered potentially eligible for listing on the NRHP.

For further historical context of the Oak Hill neighborhood, see Svendsen's reconnaissance and intensive surveys (1994 and 1995) and the *Architectural and Historical Resources of Cedar Rapids Residential Neighborhoods, 1870-1940* Multiple Property Documentation (Svendsen 2000).

#### **4.2.2 Oak Hill Findings**

As anticipated, many of the un-surveyed properties in the Oak Hill neighborhood were found to not meet integrity criteria that would associate these modest residences with the historical social contexts of Cedar Rapids. Many properties had experienced substantial alterations, primarily the application of non-original siding materials, such as asbestos, aluminum or vinyl. Another common alteration was changes made to the front porches, a typical feature of many of the original houses in this neighborhood. Of the 333 new properties, 28 are recommended as eligible for listing on the NRHP. The remaining 305 properties are recommended as not eligible. See Appendix C for tables listing the eligible and not eligible newly surveyed properties.

# Architectural History Survey and Update Cedar Rapids, Linn County, Iowa

## Oak Hill Neighborhood Figure 3

0 0.1 0.2 0.3 0.4 Miles

## **5.0 SUMMARY AND RECOMMENDATIONS**

### **5.1 SUMMARY OF FINDINGS**

The 106 Group updated the inventory forms for 262 previously surveyed properties. Of these, 133 are recommended as eligible for listing on the NRHP; 129 are recommended not eligible for listing on the NRHP. The 106 Group also surveyed 333 residential properties in the Oak Hill neighborhood that had not been previously surveyed. Of these, 28 are recommended as eligible for listing on the NRHP and 305 are recommended as not eligible.

### **5.2 RECOMMENDATIONS FOR FURTHER SURVEY**

The City of Cedar Rapids requested that The 106 Group identify neighborhoods where additional intensive survey might be undertaken. The entirety of the five-neighborhood area has had a reconnaissance survey and many properties and historic districts within those neighborhoods have been intensively surveyed. The 106 Group reviewed neighborhoods that are within areas designated by the City as Low/Moderate Income Areas and therefore would be likely to receive HUD funding in the future. Particular attention was paid to those areas where few districts and/or individual historic buildings have been identified. Of the five neighborhoods, the Young's Hill/Kingston neighborhood appears to fit this criteria. In this area, no historic districts have been designated, and few individual properties have been surveyed. Although much of this neighborhood appears to have been built during the post-World War II era, such properties are becoming increasingly eligible for listing on the NRHP. Even if such properties were not eligible for the NRHP, the evaluation of the ineligibility would be useful for the Cedar Rapids Housing Services Department to provide clearance for future HUD-funding projects.
