

## SIGN THE PETITION TO OPPOSE A BIKE BAN ON FARM TO MARKET ROADS IN IOWA

An anti-cyclists group is trying to persuade state legislators to put a bike ban initiative on the ballot. The bike ban would prohibit bicyclists from using thirty thousand miles of "farm-to-market" state and county roads in Iowa.

The Iowa Bicycle Coalition website [www.iowabicyclecoalition.org](http://www.iowabicyclecoalition.org) is collecting signatures and comments on their petition to oppose a statewide bike ban on farm to market roads in Iowa:

I oppose an effort to ban bicycles on Iowa Public roads.

Our roadways are public right-of-ways open to travel by many different means of conveyance.

Motorists and bicyclists, as well as all roadway users, have a responsibility to keep a proper lookout and operate safely.

A basic principle of traffic law is faster moving traffic should yield to slower moving traffic.

While numbers of cyclists have increased, the number of crashes and injuries have maintained the same amount of occurrences.

More can be done to make cyclists safer including changes to infrastructure, enforcement, policy, and awareness.
