

2D. Comments/questions on the recommendations for **Housing**:

~~Associations~~ Associations and neighbors to identify blocks to improve is a good idea. A Neighborhood Finance Corp. is a great idea. City ownership can be very useful if used correctly. To market all the downtown housing is probably the only way it will work.

2E. Comments/questions on the recommendations for **Zoning**:

Why is it 45 days for rental and 2 weeks for zoning. It should also be 45 days. My experience with the zoning dept. has been very disappointing.

2F. Comments/questions on the recommendations for **Vacant and/or Dilapidated Housing**:

The vacant or dilapidated housing is a target for city ownership where volunteers could fix it and used like a habitat for humanity. Youngstown, OH is currently dealing with vacant properties going back to "green space."

2G. Comments/questions on the recommendations for **Strengthening Neighborhoods**:

Faith communities and volunteers are the best plan, I think. How about neighborhood associations based on school areas. More volunteers and less government is best.

3. Other Comments/Questions?

Get rid of all the 150 lb. rodents called deer. My neighborhood would be better with less deer accidents and feces in area.
