

Important Notice

Over the next few Saturdays, the City of Cedar Rapids will be studying where groundwater and stormwater may be entering the sanitary sewer. As part of this study, we are asking you to let representatives from the City of Cedar Rapids and HDR Engineering enter your home to investigate your home's sewer and drainage connections.

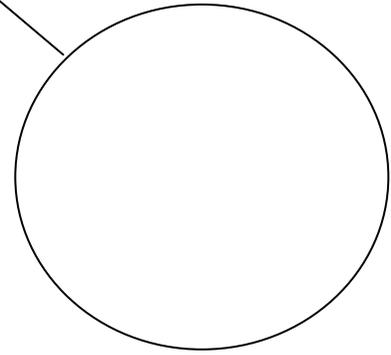

Crews will be knocking on doors in the area

this Saturday from 9-6

if you are available and interested in participating in this study.

What to Expect:

- A chance to share any problems you are having with sewer service in your area
- Crews will examine drains and sump pumps inside the home
- Crews will examine drainage outside the home
- Crews will work as efficiently as possible to minimize the disruption to your day

Why are we examining your home?

The City of Cedar Rapids is addressing a problem with excess water entering the sanitary sewer system, which overwhelms the capacity of the system leading to basement back-ups and sewer overflows. The goal is to identify areas where stormwater and groundwater are entering the sanitary sewer system, so we can plan repairs to improve the system.

Participation in this study is completely voluntary.

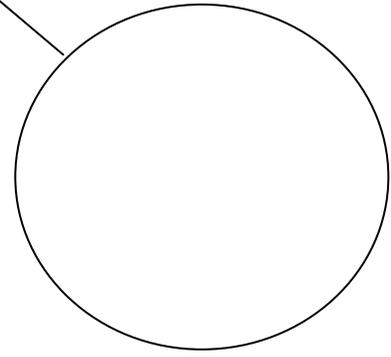

What changes are required if you find something wrong?

The City of Cedar Rapids is not requiring any changes to your drainage system at this time. This study is designed to get a better sense of the condition of the sanitary sewer in your area.

Questions?

If you have any questions about this study, contact Garrett Prestegard, Cedar Rapids Project Engineer at (319) 286-5115 or g.prestegard@cedar-rapids.org.

Information is also available at:
